

NYU Langone Dental Medicine
Postdoctoral Residency Programs

Dental Anesthesiology

(ANESTH)

SUPERIOR PREPARATION

This 36-month, ADA-CODA approved hospital-based program offers hands-on training in the anesthetic management of patients in the operating room, outpatient clinic and dental office setting.

Graduates of the program are proficient in the anesthetic management—in both hospital and non-hospital settings—of a wide range of dental patients including: children, special needs patients, phobic adults, the medically compromised, patients with extensive treatment plans, and emergency and trauma patients.

Amazing Experience

“My anesthesiology residency is everything I wanted it to be... I regularly provide treatment to pediatric, adult, and geriatric patients for a variety of procedures, both medical and dental. The experience has been outstanding.”

Nishant Chauhan, DMD, MPH, MBA

Dental Anesthesiology Alumnus, 2013,
NYU Langone Dental Medicine

Dental Anesthesiology At-A-Glance

- Comprehensive didactic curriculum to complement clinical experiences.
- Residents train at NYU Langone Hospital–Brooklyn which is a recognized Level-1 Trauma Center. In this environment, residents are exposed to a large and varied caseload comprised of an ethnically and socioeconomically diverse population.
- Off service medical rotations – one month in Pediatric Medicine, and three months total in Internal Medicine (one month in each of PGY-1, PGY-2 and PGY-3 years).
- Mobile office-based anesthesia rotation – two months in year 2 and four months in year 3.
- Surgery center rotation dedicated exclusively to anesthetic management of the dental patient (with a focus on syndromic/special needs patients) – two months in year 2.
- Work closely with medical teams.
- Attractive and competitive stipend as well as comprehensive fringe benefits are offered.

Extremely Well-Trained

“Our residents spend most of their time training in the hospital operating room, working very closely with many of the medical anesthesia providers. They are extremely well trained. When our residents graduate, they are ready to go.”

Charles Azzaretti, DDS

Program Director, Dental Anesthesiology,
NYU Langone Dental Medicine
