Postdoctoral Residency Programs

General Practice Residency

(GPR)

SUPERIOR PREPARATION

This 12-month (second year optional) ADA-CODA accredited hospital-based program is based in New York and provides training in all phases of dentistry to produce a 'super generalist'.

Residents are trained by a world-class faculty of general dentists and specialists who work one-on-one with residents in all phases of dentistry. Upon successful completion, graduates are fully prepared, highly skilled and confident clinicians.

Earned Confidence

"The greatest thing that I gained from my GPR experience was confidence and my expansion of the fundamentals of dentistry. You have an attending over your shoulders as you're doing procedures and you're doing periodontics, pediatrics, oral surgery. It is truly collaborative and comprehensive dentistry."

Daniel Di Cesare, DMD

GPR Alumnus, 1999,
NYU Langone Dental Medicine

GPR At-A-Glance

- Residents will provide comprehensive oral health care to patients from start to completion and have the opportunity to perform a variety of standard and advanced clinical procedures in all areas of dentistry.
- In addition to emphasizing comprehensive dental care, the program integrates medical applications into dentistry.
- Residents become exceptionally well-trained in the diagnosis and treatment of emergencies and trauma.
- Residents treat general dentistry patients, medically complex cases and age-specific conditions.
- Didactic instruction includes formal lectures via video-conferencing, asynchronous web-based forums, lectures and small, group interactive sessions. Courses, electives and requirements include core public health subject matter.
- Attractive and competitive stipend as well as comprehensive fringe benefits are offered.

1:1 Student-to-Assistant Ratio

“Dr. Babak Bina, Program Director–GPR, molds residents into super generalists upon graduation. A super generalist can, no matter where you’re going in the country, handle any sort of situation including medically complex patients, patients with co-morbid conditions or compromised medical history, trauma... anything. That’s GPR’s goal. We have many specialists who mentor and collaborate with our residents. We are a family and have created an environment of constant learning.”

Bethany Harris, DDS

GPR Alumna 2012, Associate Director,
General Practice Residency,
NYU Langone Dental Medicine
